

To Whom It May Concern:

I was recently informed that XM Satellite Radio is under attacks from the NAB for wanting to improve the services it offers to its customers. This seems odd to me since XM realizes the benefits of offering traffic and weather on its stations. All they are trying to do is put the customer first which is the number one rule of any good business.

Don't punish XM and its listeners and most importantly your time and my tax dollars on something so small. How about spending more time talking about American Jobs, Gas Prices, The War, National Security and the budget deficit.

XM has a first amendment right of freedom of speech and rule would be unconstitutional. If the local radio stations could provide these services then why can't XM. It is not like Americans don't have choices on what they want to listen to, XM is not hurting anybody and is actually probably saving lives on our roads in the process. Because now there are a few less Americans changing stations and not paying attention to the road.

Enough of my ramblings, but please don't vote in favor of this ridiculous Petition. And my right to listen to XM Satellite Radio.
